Hi Hector,

If you could send a crew out there, it would be much appreciated by all

Also let me add that the median just north of Manchester looks like it hasn't been watered in ages. The flowers are dying and the grass is brown. Does the group that looks after the area south of Manchester look after this area too? Seems that the businesses north of Manchester are in the BID. Then there are the medians way north and they don't look so hot either. Surely someone can fix the timer system!

Nate,

We still have a problem with the sprinklers in the median north of 83rd on Sepulveda Blvd.

I passed by there around noon today and the sprinklers were on and it looked like they have been on for some time. The street was all wet.

I went by there again at 7:15 PM and the sprinklers were still on.

Re: Sepulveda Blvd sprinklers, between 80th and...

Not looking good for the City to have this continue to happen.

It fortifies our case in having the Westchester Town Center BID handle the maintenance for the medians.

Please have those responsible fix the system.

Thanks

John Ruhlen

Hi Hector,

We are getting reports that these same sprinklers are still blasting all day long as I type. Can you please look into this?

Thanks again,
Nate

Hello Hector:

Don Duckworth (copied in this email) is concerned that the sprinklers in the median were on all day on Monday. Can you look into this? Let me know.

Don: Please feel free to email me with any casework concerns you may have in the future. Such as pothole requests, street lights that are out, etc. Thanks.
